### **DETAILED ACTION**

Claims 1-3 are presented for examination on the merits.

#### ***Papers***

The Preliminary amendment filed October 20, 2003, has been received and entered.

#### ***Information Disclosure Statement***

The information disclosure statement (IDS) submitted on October 20, 2003, was received. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

#### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of

the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hahn in view of Kovacs, both cited on the enclosed PTO-892 Form.

Claims are drawn to a method for lowering cholesterol via co-administering a plant sterol and soy material. Further, an isoflavone is administered.

Hahn teaches a a method for lowering cholesterol via co-administering a plant sterol and soy material. Further, an isoflavone is administered.

Kovacs teaches genistein, at col. 2, line 2.

The claims differ from Hahn in that the sterol comprising 0.49% by weight and genistein is not disclosed.

It would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to co-administer a plant sterol and soy material as disclosed by Hahn and further to select for an isoflavone such as genistein as disclosed by Kovacs to lower blood concentraton of cholesterol. Also the admistering of these agents would have been expected to provide successful results for minimizing the development of atherosclerosis. To vary the amount of plant sterol is clearly within the purview of an ordinary artisan and to select for slightly less than half of an amount by

weight of plant sterol is an obvious modification. The claims are prima facie obvious over the cited prior art.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

The remaining references listed on the enclosed PTO-892 and/or PTO-1449 are cited to further show the state of the art.

No claims are allowed.
